

HIMANSHI SHRIVAS

Charlotte, NC | himanshishrvas0007@gmail.com | [linkedin.com/in/himanshishrivas](https://www.linkedin.com/in/himanshishrivas) | github.com/darpan02-cypher | +1(704) 293-1718

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building scalable backend systems and ML-driven applications. Strong in Python for machine learning, data analytics, feature engineering, and model evaluation, with industry experience in Java, Spring Boot, distributed systems, and AWS cloud environments. Experienced in CI/CD automation, observability, and deploying production-grade systems aligned with AI/ML and SRE best practices.

EDUCATION

University of North Carolina at Charlotte, Charlotte, NC Jan 2025 – Dec 2026
Master of Science in Information Technology

Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore, India Jul 2017 – Aug 2021
B.Tech in Computer Science (Big Data Analytics)

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Frameworks & Libraries: Spring Boot, React, Django, Scikit-learn, XGBoost, Pandas, Gradio, MLlib, REST APIs, Microservices

Databases: PostgreSQL, MySQL, MongoDB, Redis

DevOps & Cloud: AWS (EC2, S3, CloudWatch), Docker, Kubernetes, Jenkins, Harness

ML/AI: Model Evaluation (Precision, Recall, ROC-AUC), A/B Testing, EDA, Prompt Engineering, LLM Integration

Tools: Git, Postman, Splunk, AppDynamics, Grafana, Tableau, Jira, Databricks, Cognos, SonarQube

Testing: Unit Testing, Mockito

PROFESSIONAL EXPERIENCE

UNCC | Teaching Assistant — Big Data Analytics & Software Engineering, Charlotte, USA May 2025 – Present
• Mentored 80–100+ students in software engineering and data analytics, covering software process models, Agile project execution, design patterns, requirements engineering, data management, ML/AI model development, A/B testing, and Python-based analytics, while guiding labs, projects, and evaluations.

Capgemini Technologies | Senior Software Engineer, Bangalore, India Oct 2021 – Dec 2024
• Engineered scalable applications using **Java/Spring Boot**, optimizing performance, improving system responsiveness, and easing future integration. Used **Splunk, AppDynamics, Grafana**, and **AWS CloudWatch** for system observability and performance insights, helping reduce downtime and accelerate incident response.
• Designed and developed **REST APIs** using Java and Spring Boot in a microservices-based architecture.
• Pioneered CI/CD pipeline analysis evaluating Jenkins and Harness integration with AWS, which flagged opportunities to reduce deployment errors by **15%** and improve resource allocation by **12%**.
• Led change and release management processes, mentoring and onboarding new team members while standardizing deployment practices to minimize rollovers and ensure consistent delivery.

Alsoft Solutions | Web Developer Intern, Mohali, India Feb 2021 – Jun 2021
• Proposed and developed an integrated cloud-based platform that streamlined healthcare data exchange, automated workflows, and improved collaboration among hospitals, patients, and insurance providers.

Blucursor Technologies | Developer Intern, Indore, India Jul 2020 – Oct 2020
• Worked on an AI-based attendance system using computer vision and deep learning for real-time face recognition.
• Implemented face detection module with **OpenCV** and **CNNs** for accurate, automated attendance logging.

PROJECTS

Predictive Healthcare Passport

- Built ML models (**XGBoost, Random Forest**) to predict multi-disease health risk with over **90% accuracy**.
- Developed a **GenAI-based** health recommendation module and deployed via **Gradio** web app.

Employee Performance Dashboard

- Automated KPI tracking using **Jira Analytics**, visualizing sprint velocity and SLA adherence.
- Delivered actionable insights on team productivity and backlog health, enabling data-driven sprint planning.
- Improved leadership decision-making by highlighting bottlenecks and optimizing resource allocation.

Distributed Task Scheduler

- Built a distributed task scheduling system handling asynchronous jobs across worker nodes, improving throughput **200%**.
- Leveraged **Redis** as a message queue for scalable, fault-tolerant task processing with retries and idempotency.
- Containerized services with **Docker** for consistent deployment.

Multimodal Neural Signal Processing & Deep Learning Pipeline (In Progress)

- Developing an end-to-end ML pipeline for **EEG (32-channel)** and **fNIRS** data, applying multiple imputation techniques to handle missing sensor values and ensure data integrity.
- Engineering temporal, spectral, and spatial features for cognitive state classification, targeting **>85%** classification accuracy across 5 cognitive load conditions.
- Implementing **Conformer-based deep learning architecture using PyTorch**, combining convolutional and transformer layers for superior sequence modeling on biosignal data.

ACHIEVEMENTS / PARTICIPATION

- 3rd Place Overall** – Pearl Hacks 2026 (MLH, UNC Chapel Hill) | Best Use of Solana | Fidelity 2nd – Best Hack for Finance for All
- 1st Place** – IBM Inter-College Data Analytics Project Competition
- Top 10 Nationalist** – Smart India Hackathon (Govt. of India)
- Built AI-driven systems at **VTHacks** (MLH, Virginia Tech) & **NASA Space Apps 2025**

CERTIFICATIONS

- Data Science (IBM Developer Skill Network), Big Data Analytics, Java Full-stack Development, Agile Software Development, Introduction to Cloud, Introduction to Cyber Security (CISCO)
- Training: AWS Practitioner, Python Web Development, AI Agent Fundamentals, Data Structures & Algorithms
